

Where does each piece of evidence belong?

→ *more convincing evidence that something changed*

Delivered

it happened

Produced

something was made

Implemented

people do it at work

Impact

it made a difference

Feedback forms:
4.8 out of 5 for “overall
satisfaction”

4

“Observed doing it
on the ward at 30 days”

13

Attendance list:
48 staff

1

Fewer falls in the area
six months later

17

End-of-day
quiz scores

9

Certificates of attendance
for everyone

6

Audit at 60 days:
bedside checks recorded 41% →
78%

15

Photos from
all four days

2

Confidence ratings:
3.1 before, 4.4 after

11

The course post on the intranet:
112 likes

7

“The team now does the four
checks”
(their manager, at 90 days)

14

Delegate packs
handed out

3

Patient survey: more say
“I knew how to call for help”

18

A handover checklist
redesigned on day 3

10

“The room was freezing
and I couldn't find the venue”

5

A peer watched two staff
teach the checks to a student

16

Flipchart photo of
eight commitments

8

Simulation:
9 of 10 met the standard

12

How to play

1. One set per table. Shuffle the cards and share them round.
2. Read your card aloud and put it in a column: what does it actually show?
3. Six minutes. Then: which columns did most of your cards land in?

Facilitator only

1. Attendance list: 48 staff: Delivered · none
 2. Photos from all four days: Delivered · none
 3. Delegate packs handed out: Delivered · none
 4. Feedback forms: 4.8 out of 5 for “overall satisfaction”: Delivered · L1
 5. “The room was freezing and I couldn’t find the venue”: Delivered · L1 (its real use: fix the logistics)
 6. Certificates of attendance for everyone: Delivered · none
 7. The course post on the intranet: 112 likes: Delivered · none (popularity, not learning)
 8. Flipchart photo of eight commitments: Produced · none yet: an intention, not a change
 9. End-of-day quiz scores: Produced · L2
 10. A handover checklist redesigned on day 3: Produced · L2
 11. Confidence ratings: 3.1 before, 4.4 after: Produced · L1/L2 (self-rated confidence, not capability)
 12. Simulation: 9 of 10 met the standard: Produced · L2 (shows how, in a controlled setting)
 13. “Observed doing it on the ward at 30 days”: Implemented · L3
 14. “The team now does the four checks” (their manager, at 90 days): Implemented · L3
 15. Audit at 60 days: bedside checks recorded 41% → 78%: Implemented · L3
 16. A peer watched two staff teach the checks to a student: Implemented · L3 (and spreading)
 17. Fewer falls in the area six months later: Impact · L4 (hard to attribute)
 18. Patient survey: more say “I knew how to call for help”: Impact · L4-ish (patient experience; hard to attribute)
- Debrief: counts show it happened, not that anything changed. L1's real use: the cold room, the venue. Running what you made on the group this morning was use: Level 3-type evidence, inside the room.*
